

(a) Observed land use, period 3

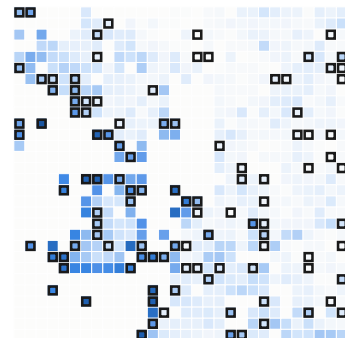

outline: change since period 2
30 × 30 window of the domain

**(b) One realisation**

random forest, median draw
FoM 0.13 (whole domain)

**(c) Change frequency**

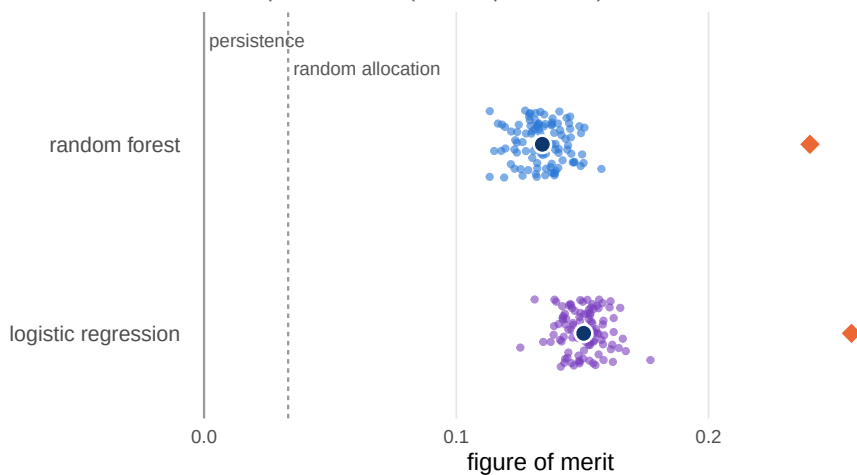

random forest ensemble
outline: observed change

■ forest ■ urban ■ hit ■ false alarm
■ arable ■ lake (fixed) ■ miss ■ wrong hit

(d) Figure of merit against the held-out observation

one dot per realisation (n = 100 per learner)

◆ deterministic allocation ● ensemble expectation

(e) Where change is placed

changed cells by their true probability
