

(a) Observed land use, period 3

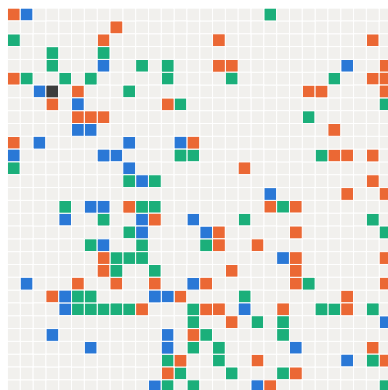

outline: change since period 2
30 × 30 window of the domain

forest urban
arable lake (fixed)

(b) One realisation

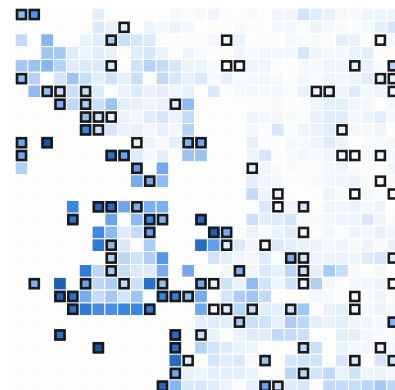

random forest, median draw
FoM 0.14 (whole domain)

hit false alarm
miss wrong hit

(c) Change frequency

random forest ensemble
outline: observed change

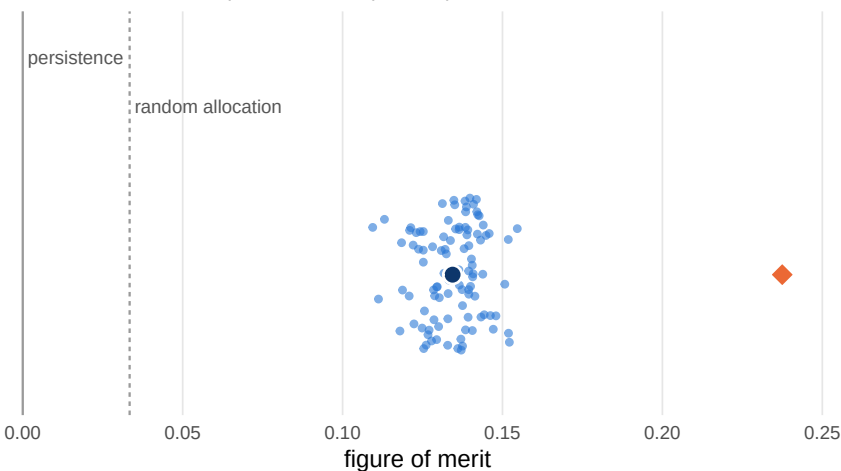

share of realisations

0.0 0.5 1.0

(d) Figure of merit against the held-out observation

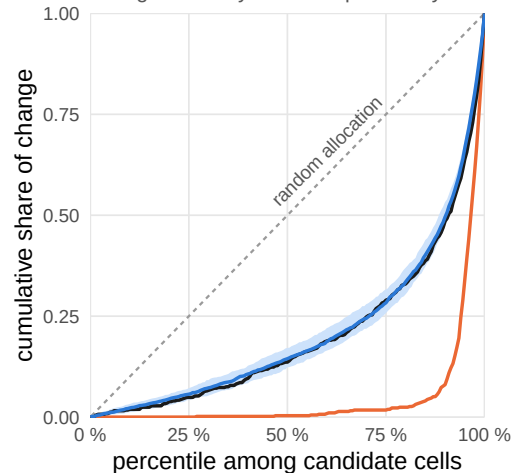

random forest; one dot per realisation (n = 100)

◇ deterministic allocation ● ensemble expectation

(e) Where change is placed

changed cells by their true probability

— observed change
— realisations (median, 5–95 %)
— deterministic allocation
