(a) Single maps vs. ensembles
small dots: single realisations (n = 100 each); markers: ensembles;
arrows: from the median realisation to its ensemble
true process (maximum)
potentials (no allocation)
Brier null: uniform forecast
FoM null: random placement

(b) Where change is placed
changed cells by true probability;
line: median, band: 5 to 95 % of realisations
random placement
cumulative share of change
percentile among candidate cells
