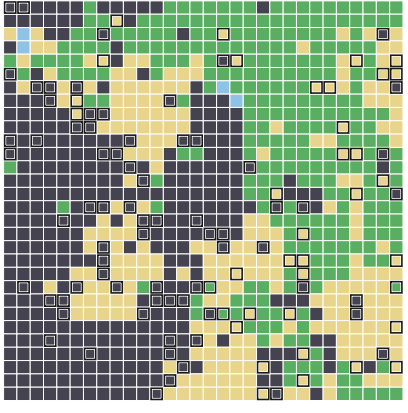
(a) Observed land use, period 3

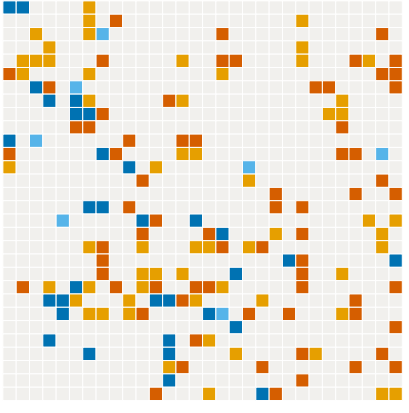
all cells; outline: changed since period 2
30 × 30 window of the domain



forest urban
arable lake (fixed)

(b) One realisation

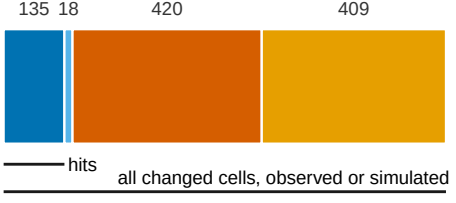
random forest, CLUMPY, a typical draw,
scored cell by cell



hit miss
wrong hit false alarm

(c) Figure of merit

cells of the whole domain by outcome;
persistent cells do not count



FoM = hits / all changed cells
= 135 / 982 = 0.14

random placement of the same quantities: 0.03
