

(a) Observed change

period 2 to 3, held out; 30×30 window

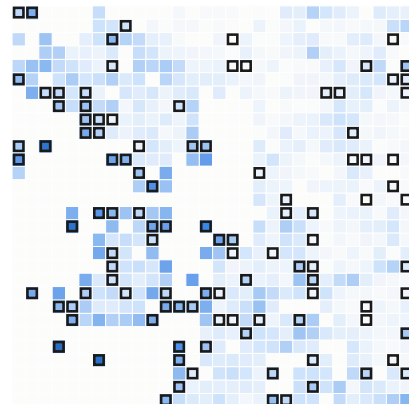

(b) One realisation

median draw, FoM = 0.10 (whole domain)

(c) Change frequency

outline: observed change

■ observed change ■ hit ■ miss ■ false alarm ■ wrong hit

share of realisations

0.0 0.5 1.0

(d) Figure of merit against the held-out observation

one dot per realisation ($n = 100$)
